

TO WHOM IT MAY CONCERN

In the November 2008, **IM SAFETY CONSULTANCY SERVICES Pte Ltd** has conducted Risk Assessment in our premise. Although I only somewhat knew the procedure and our product here in our workshop, their comprehensive Risk Assessment gives me some knowledge on Health & Safety matter. So, I recommend their capacity in conducting Risk Assessment with step 1 to 5 in detail procedure including risk rating.

I believe that IM Safety can give you, how to identify the hazard, and minimize/eliminate them with existing and additional risk control in their comprehensive report.

Hence, I wish **IM Safety** all the best in future.

Truly,

Mr. FUA TIN NYAP (KELVIN)
