TESTIMONIAL

I would unhesitating recommend IM SAFETY team and services to Kimmak Engineering Work Risk Assessment Report (RA), and plan to engage you for my safety and health related subjects.

By applying Risk Assessment, we can see that the best option is to develop a Safety and Health culture within our premise. It is worth much more for us to take our time and get our business more improving and developing. We found this report is very comprehensive and useful reference in implementing our daily routine and non-routine works. This report provides us for finding hazards and additional control measures in implementation of risk management to our operations. It also helps us to identify the source of risks and shall take all reasonably practicable steps to eliminate or mitigate any foreseeable risk not only to our employees but also our valuable customers.

We believe the RA report will add value to our business by helping to improve overall safety awareness and it is essential to our workplace safety and health practices. Once again, we would like to thank for your effort and assistants to implement risk management at our workplace.

Yours truly,

Wong Kim Fatt
